Profile

My name is Mahdi Mirabi. I was born in Abadeh in 1990. In 2012 I was forced to leave my country because of my personal beliefs and that's why my academy education was unfinished.

I started my programming career since 2009. But in those years I worked more on executive projects (Computer Networks) Despite the experience and scattered programming projects during that year, in late 2016, I decided to restart. I generally use CMS WordPress on a web-based project, but for certain sites and applications using Framework Laravel I use Bootstrap, Node.js, Vue.js, jquery, Bulma, Bootstrap. Meanwhile, I've been developing Swift Apple Developer and (Android Development) Java for a smartphone project in my program.

Work experience
